- Room Database

KEY SKILLS

- OpenCV(Face Recoganisation)
- Geofencing(Employee Tracking)
- Offline App Developer
- Expert In Functional Knowledge

PROFILE OVERVIEW

I have 2 years of experience in software development, serving as a full-stack webdeveloper and mobile app developer. I am honored to be recognized as the Gold Star Performer of the Year at my company. I have successfully implementedOpenCV and geofencing features in my mobile app application. Additionally, I have contributed to various departments such as Asset, Purchase and Inventory,CRM, Payable, Receivable, and Research and Development. I have experience inonsite. client meetings. I am very proficient in functional knowledge.

WORK EXPERIENCE

ASSET (FULL STACK DEVELOPER)
In the project, we manage Asset Products by creating Asset Invoices and generating barcodes for them. This application utilizes both Angular and VB.NET Framework. For the database, we use MySQL. My responsibilities in this project, as a full-stack developer, include providing client call support and assisting with data patchwork. I have successfully delivered this project for various industries, such as schools, colleges, and manufacturing.
CLIENT : SRM , SAMUNNATI , CHENNAI AMIRTHA , ANJAAN

SCM (FULL STACK DEVELOPER)
In the project, we maintain purchased products and inventory stocks. Users can raise Material Requisitions, Purchase Requisitions, and Purchase Orders. They can also create quotations for products. This application utilizes both Angular and VB.NET Framework. For the database, we use MySQL. My responsibilities in this project, as a full-stack developer, include providing client call support and assisting with data patchwork. I have delivered this project for various industries like School, Colleges, Manufacturing .
CLIENT : SRM , SRM DIAGNOSTICS , DYNETICS , RAINI , KARTHIKA

HRMS (MOBILE APP DEVELOPER)
I have implemented a new mobile application for the Attendance system in HRMS. The application fetches the user's location and allows them to mark their attendance. I incorporated a geocode functionality for address retrieval, and it is seamlessly integrated with Google Maps.

MAINTENANCE (MOBILE APP DEVELOPER)
I have developed a new mobile application for product maintenance. Users can raise complaints to the manager regarding issues with their products. The manager assigns tickets to the appropriate personnel who then address and resolve the product issues. I've implemented both offline and online modes to ensure functionality in various network conditions. Additionally, the project features face recognition login for enhanced security and user authentication.
CLIENT : SRM TRICHY

INTERNSHIPS

Microsoft Dynamics 365 Business Central, Microsoft India Development Center
Apr 2022-May 2022

BENGALURU

•Demonstrated a keen understanding buisness processes and requirements integrating functional knowledge in to development of software applications.

DECLERATION

I hereby declare that the Information furnished above is true to the best of my knowledge.

Your's sincerely,
Balu Saran P
